

**REPUBLIC MANUFACTURING UNDERSTANDS THE CHALLENGES YOUR BUSINESS FACES AND CUSTOM ENGINEERS PRODUCTS IN-HOUSE TO IMPROVE OVERALL EFFICIENCY AND COSTS. OUR EXPERTISE IS IN IMPACTING AND SUPPORTING YOUR SUCCESS.**

## REGENERATIVE BLOWERS

Used for feeding paper into printing machines, sorting and counting pages, and picking, placing and stacking paper. They fold and cut paper without damaging the paper. After each roll, they remove and collect excess paper.

- Paper Feeding
- Scrap Collection
- Folding and Cutting

## ROTARY VANE VACUUM AND COMBINATION PUMPS

Used to transfer sheets from forming section to press section, stacking and placing paper before stitching or folding, and extracting water from paper. They can be applied to sheet-fed offset presses, pre-press vacuum frames, plate makers, stitches, binders, folders, cutters, mailing and inserting equipment, joggers, turners, and more. They require minimal maintenance and are energy efficient.

- Suction Pickup and Transfer Rolls
- Collating and Bookbinding
- Paper Handling
- Suction Press

## MOTORS

Used to assist in faster turnaround times while meeting accredited standards. They are cost-effective and maintain an ecological footprint.

- TEFC and NEMA Certified
